Suite 600  
Suwanee, GA 30024

To the Eclipse Team,

On behalf of the team at Gwinnett Drugs, we would like to extend our gratitude for the expertise and involvement of your entire team.

We appreciate the fact that, when working with Eclipse, an entire team of experts supports the project, not just a single individual. We had a designer, architect, project manager, on-site project supervisor, as well as the company's executive team all heavily involved in our project to ensure we received the very best service, and it was not uncommon to see your CEO, President, and Vice President on-site during construction checking in and making sure things were going smoothly.

The attention to detail in your management of subcontractors and coordination of their schedules was beyond measure, especially considering our unique situation of having to stay open and operational during the entire project. The whole team handled this very well, allowing us to continue to provide our customers with great service, while limiting the pains associated with working in a construction environment.

Our team also greatly appreciates the work that went into to the design to provide an excellent customer experience while reducing unnecessary spending, allowing us to focus on the things that matter. When changes needed to be made, Eclipse took the time to explain the change, why it was needed, and what effect it would have on the project. This allowed us to be confident in approving those changes.

Now, over a year after completion, we are still very pleased with the outcome of the project. The design enables a smooth workflow, maximizes space, and provides a beautiful facility for both employees and customers.

We felt assured throughout the process that choosing to work with Eclipse was the right choice.

We appreciate all your effort in giving us a beautiful new facility.

Sincerely,

**Brian Morris**  
COO
